

ILLNESS POLICY

If you suspect your child is becoming ill, or has symptoms of illness, please be considerate of others, and your child, by keeping them at home to rest.

Vomiting, diarrhea, stomach cramps, fever, sore throat, coughing through the night, colored discharge from the nose, pink/crusted eyes, and rashes or hives, are signs of illness. Please call your doctor about these symptoms before bringing your child to school. A child who has diarrhea, and is not treated properly, can contract the rotavirus, and spread it through an entire school.

Your child must be free of any of the above symptoms for 24 hours before returning to school. Otherwise, your child is still contagious, and will give their illness to other students or their teachers. It is in your child's best interest to be completely well before returning to school, to avoid a relapse.

Please do not send your child to school if you feel they are too sick to go out on the playground. A staff member will not be able to stay inside to watch one child.

We know it is hard to keep your child at home when you work, but please continue to stay considerate of others, and the well-being of your child.

Thank you for your cooperation!

I have read and comply with the above _____
